Gift Card Demo Procedures

Following are instructions and settings for demoing the Centralized Gift Card System. Please read this in conjunction with the User's manual.

Requirements

- Restaurant Manager v19 or later with gift cards interface enabled
- Rmccwin.exe dated 10/1/04 or later
- Gift Card numbers must be 16 digits long and are numeric only (alpha characters not allowed)
- Continuous access to internet from computer running rmccwin.

Restaurant Manager Back Office (RMWIN) Settings

- Go into Station Configuration, and enable the Gift Card Interface and set the "Gift Card Type" to "ASI".
 - Go to Setup->Settlement->Forms of Payment. Create a new form of payment called "Gift card".
 - On RM version 15 and later, check the Gift Card/Certificate box

Restaurant Manager Credit/Gift Card interface module (RMCCWIN)

- Go to File->General Setup->Credit card interface type and select the "disable" option.
- Go to File->General Setup->Gift Card Options. Select "ASI Centralized Gift Card".
- Under ASI Gift Card Options, enter the following values (obtained from the Store Information Setup Screen at the Gift Card Server, [rmgiftcards.com](http://www.rmgiftcards.com)):
 - Chain ID (demo = 1)
 - Restaurant ID (demo = 4)
 - Gift card interface password (demo: 4444)
 - Gift card Server URL (www.rmgiftcards.com) (DO NOT prefix with http://)
 - Hit OK, then make sure to hit Start before running the POS.

To Process a Gift Cards

See the User's manual.

To view transactions on-line

Go to <http://www.rmgiftcards.com>, click on Merchants Login, and use the username-password combination test-test to logon. You will be logged in as a level 2 restaurant operator with authority to view gift card transaction information.

Gift Certificate Demo Setup

Yet to be implemented. For now go to www.chatnchew.net to demo on-line gift certificate handling.
